PALLET MATE

Economic Efficient Pallet Wrapping

Pallet Wrappers

Using stretchwrap film to secure a load to a pallet prior to transit, is an ideal way of protecting palletised products. Loveshaw pallet wrappers can use significantly less film by stretching the film as it is applied, they wrap quicker, save time and improve throughput. Pallet wrappers provide a consistent wrap quality and reduce health & safety concerns. Demonstrations show that using a Loveshaw pallet wrapper can reduce the time and materials to wrap a pallet. Cost savings of over 30% are regularly achieved. We offer core-brake and power pre-stretch turntable semi-automatic pallet wrappers

Palletmate Features

- Simple film tension control
- The highest levels of Health & Safety
- Easy to load film carriage
- Durability and simplicity

Control Panel

- Just simple, industrial, knobs and buttons.
- Adjustable pallet height selection.
- Category 4 safety circuit.

Turntable

- Heavy duty chain & sprocket offers reliable and consistent drive for weighty loads.
- 10mm steel turntable ensuring minimal distortion for a smooth wrapping performance.
- 12 durable bearing mounted rollers for even load distribution, quick mounting for easy replacement.
- Soft start, allows wrapping of light and unstable loads.

Specifications

Load Dimensions

Maximum load: 1200x1000mm
Maximum height: 2200mm
Maximum weight: 1750kg

Technical Data

Power requirements: 240v 1ph
Turntable: 1670mm
Throat distance: 500mm
Variable film tension

Health & Safety

Category 4 safety circuit
Low voltage control circuit
500mm clearance

Options

Increased turntable diameter
Heavy duty loading ramp
Scale-pack weigh station
Service contract

Loveshaw Europe Limited

The complete package solution

Pallet Wrapping + Case Sealing + Case Coding + Case Erecting
