

# PALLET MASTER

Possibly the best Pallet Wrapper in the world?

## Pallet Wrappers

Using stretchwrap film to secure a load to a pallet prior to transit, is an ideal way of protecting palletised products. Loveshaw pallet wrappers use significantly less film by stretching the film as it is applied, they wrap quicker, save time and improve throughput. Pallet wrappers provide a consistent wrap quality and reduce health & safety concerns.

Demonstrations show that using a Loveshaw pallet wrapper reduces the time and materials to wrap a pallet. Cost savings of over 30% are regularly achieved. We offer core-brake and power pre-stretch turntable semi-automatic pallet wrappers.

## Palletmaster Features

- Excellent film saving opportunities
- The highest levels of Health & Safety
- Fantastic load retention qualities
- Easy to load film carriage
- Fully enclosed tower assembly
- Durability and simplicity

## Control Panel

- Top and bottom wrap counters with individual settings for efficient wrapping.
- 3 wrap modes: Up Only (economy), Up & Down (stability), Waterproof (manual application of top sheets).
- Photocell On/Off mode, simplifies the wrapping of awkward or dark loads, including trolleys and cages.
- Variable speed controls for turntable, wrap up and wrap down give maximum wrapping flexibility.
- Just simple, industrial, knobs and buttons.

## Turntable

- Heavy duty chain and sprocket offers reliable and consistent drive for weighty loads.
- 10mm steel turntable ensuring minimal distortion for a smooth wrapping performance.
- 12 durable bearing mounted rollers for even load distribution, quick mounting for easy replacement.
- Soft start, allows wrapping of light and unstable loads.

## PPS Film Carriage

- Reduces packaging costs with a 245% power pre-stretch.
- Saves time and simplifies film loading with our simple gate opening head.
- Enclosed film carriage maximises operator safety and minimises risk of damage.
- External film release button, allows effortless film dispense to pallet.
- Enclosed design minimizes accidental damage to film carriage therefore increasing reliability and efficiency.

## Mast Enclosure

- Unique mast enclosure provides a high level of operator safety.
- Fully enclosed steel structure protects the film carriage and stretch film.
- The only pallet wrapper designed in the UK with a hinged tower for easy site location
- Full size access door which allows for simple film loading and makes servicing easy.

## Specifications

### Load Dimensions

Maximum load: 1200x1000mm  
Maximum height: 2200mm  
Maximum weight: 2000kg

### Technical Data

Power requirements: 240v 1ph  
Turntable: 1670mm  
Throat distance: 500mm

### Power Pre-stretch

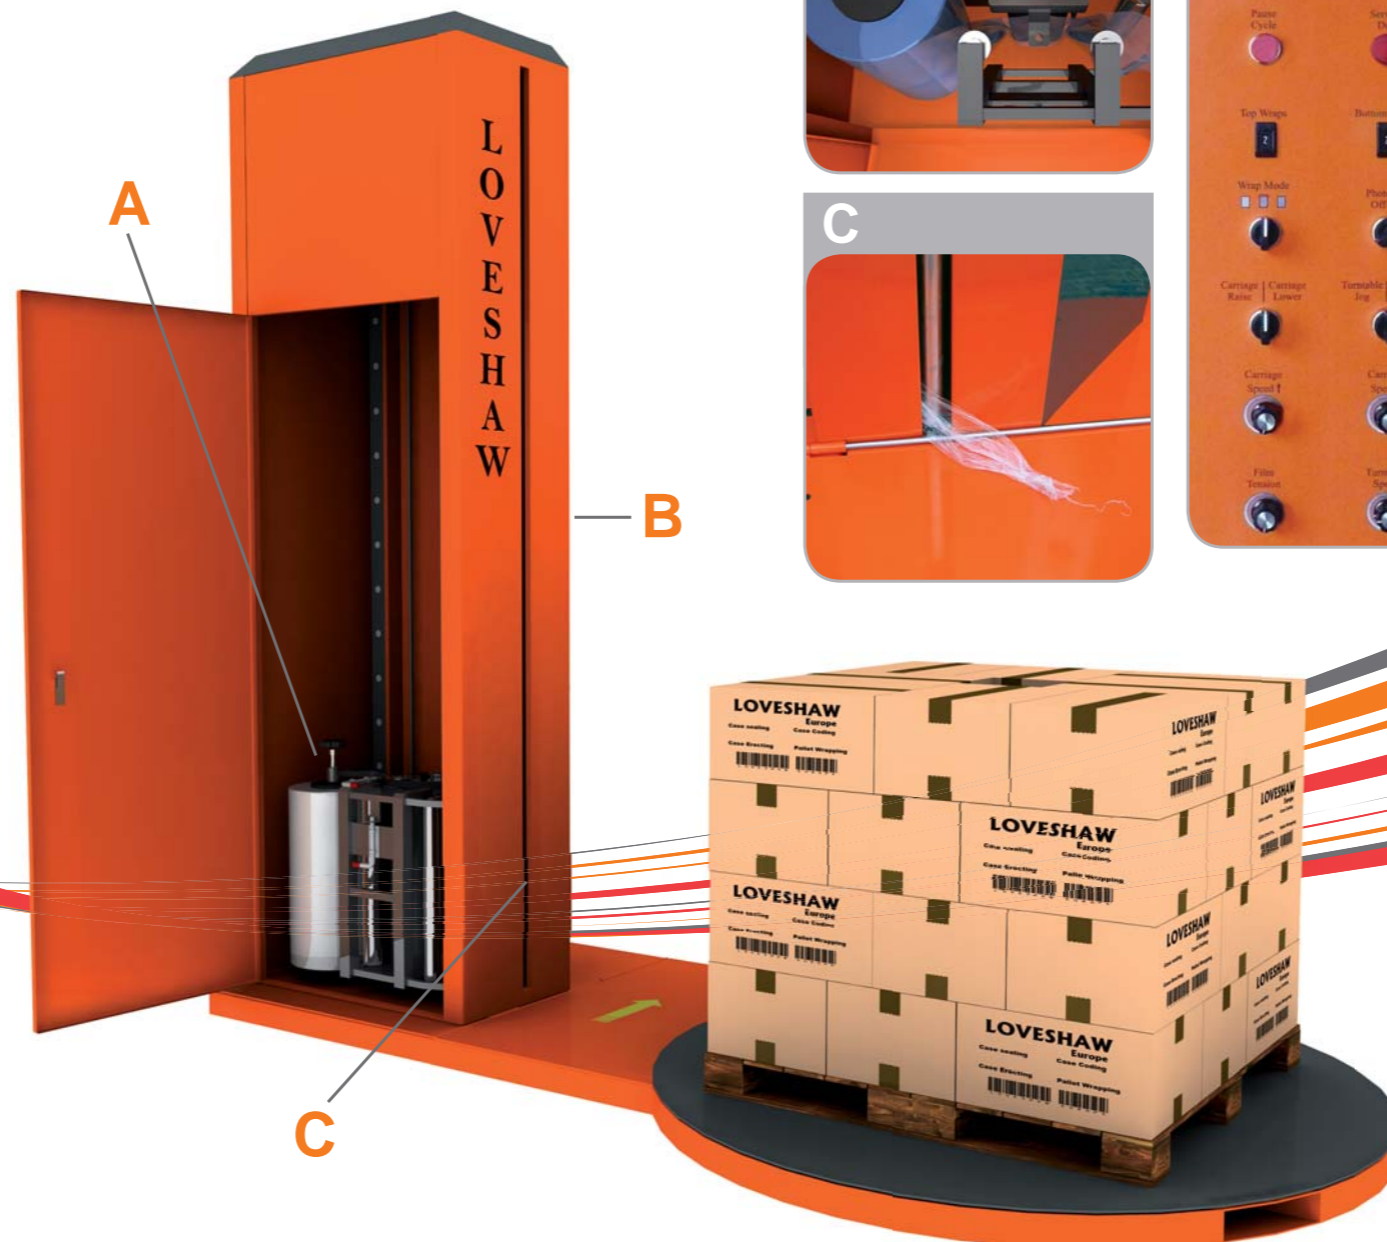

Stretch ratio: 245%  
Film requirements: 300%  
Variable lay on force for light loads

### Health & Safety

Category 4 safety circuit  
Interlocked door  
Audible sounder  
Enclosed carriage  
500mm clearance

### Options

Increased turntable diameter  
Top load stabiliser arm  
Heavy duty loading ramp  
High profile base  
Scale-pack weigh station  
Cold room thermal upgrade  
Service contract

Possibly the best Pallet Wrapper in the world?

## The complete package

### About Loveshaw Europe

Founded in 1962, and owned by ITW (Illinois Tool Works) since 1995, Loveshaw offer over 45 years of unrivalled knowledge and experience of end-of-line packaging machinery.

We supply robust, quality engineered and easy to use end-of-line packaging machinery and systems. Machines are modular, and can be utilised either as stand alone or part of a larger integrated system. The Loveshaw 'Little David' brand is extremely well known within the packaging industry.

The full range of packaging solutions includes:

- Case erecting machines
- Case sealing machines
- Case coding ink jet printers
- Pallet wrappers
- Label applicators
- Print & apply labelling
- Service and support
- Consumables and spares

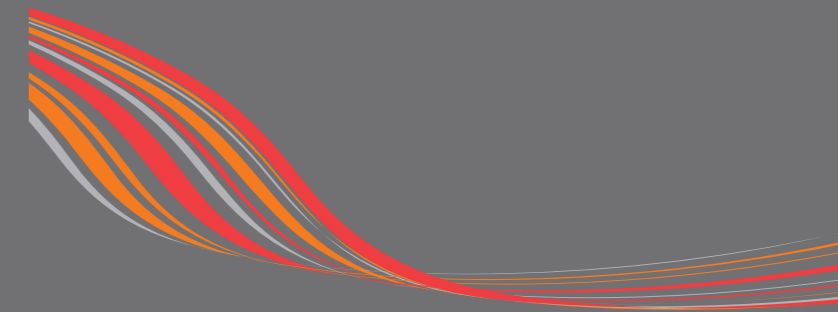

We provide our customers with quality products that meet their requirements. Our packaging machinery is very competitively priced. Quality is achieved through constant product reviews and by listening to our customers.
